

YAKUB ALI MOHAMMED

Centennial, CO | +1 (719) 286-0665 | yakubali.mohammed@applywizard.ai | [Portfolio](#)

PROFESSIONAL SUMMARY

- Network and Infrastructure Engineer with 6+ years of experience supporting enterprise data centers, routing, switching, security, application delivery, and infrastructure modernization.
- Hands-on technical expertise in designing and supporting Cisco Nexus 9000, Cisco ACI, VXLAN, BGP, OSPF, F5 BIG-IP, Cisco ASA, Juniper SRX, Palo Alto, and IPv4/IPv6 environments.
- Delivered core-link upgrades, DNS migrations, firewall transitions, and backup-network deployments across 24 data centers, including Rubrik connectivity in 13 locations.
- Coordinated enterprise network documentation, infrastructure changes, migration planning, and cross-functional implementation activities using Jira, Remedy, Microsoft Visio, and Lucidchart.

TECHNICAL SKILLS

Network Engineering: TCP/IP, IPv4, IPv6, BGP, OSPF, EIGRP, Multicast, VLANs, STP, EtherChannel, Port Channels, Route Maps, Prefix Lists, Local Preference, AS Path Prepending, HSRP, VRRP

Data Center Networking: Cisco Nexus 9000, Cisco ACI, VXLAN, EVPN, FabricPath, Leaf-Spine Architecture, VPC, VDC, VRF, EPGs, Bridge Domains, Tenants, Contracts, L2Out, L3Out

Network Security: Cisco ASA, Juniper SRX, Palo Alto Networks, ACLs, NAT, IPsec VPN, Site-to-Site VPN, Firewall Policy Management, Network Segmentation, Secure Remote Access

Application Delivery & DNS: F5 BIG-IP LTM, A10 Networks, Virtual Servers, Pools, Pool Members, Health Monitors, SSL Offloading, DNS, DHCP, Anycast DNS, Infoblox

Infrastructure & Systems Support: Enterprise Infrastructure, Data Center Operations, Network Support, IT Support, Systems Support, Endpoint Connectivity, Hardware Installation, Device Upgrades, Incident Management, Change Management, Problem Management

Cloud & Virtual Infrastructure: AWS Cloud Fundamentals, Infrastructure as a Service, Hybrid Infrastructure, Virtual Machines, Data Center-to-Cloud Migration, Rubrik Backup Infrastructure

Platforms & Tools: Cisco IOS, Cisco NX-OS, Junos OS, PuTTY, Jira, Remedy, Microsoft Visio, Lucidchart, Git

PROFESSIONAL EXPERIENCE

Network Engineer IV

Oct 2022 - Present

Charter Communications | Denver, CO

- Engineered Cisco Nexus 9000, VXLAN, VPC, VRF, BGP, IPv4, and IPv6 connectivity while turning up core links across 24 data centers, increasing bandwidth capacity for backup, DNS, video, and enterprise services.
- Deployed Rubrik appliances across 13 data centers by allocating IPv4 and IPv6 subnets, preparing implementation cut sheets, and coordinating ISP and infrastructure teams to establish reliable virtual-machine backup connectivity.
- Coordinated VLAN migrations, readiness reviews, implementation cut sheets, and pre-change validation across data centers, improving accuracy and completing changes within approved maintenance windows.
- Migrated legacy FabricPath environments to Nexus 9000 leaf-spine and VXLAN architectures, validating VLANs, VPCs, VRFs, port channels, and routing while completing 100% of planned cutovers with documented rollback procedures.
- Implemented IPv4 and IPv6 eBGP for RDNS and EDNS platforms using route maps, prefix lists, communities, local preference, and AS path prepending, enabling resilient Anycast DNS routing across 24 data centers.
- Modernized firewall connectivity by transitioning Cisco ASA policies to Juniper SRX and Palo Alto platforms, translating ACL, NAT, VPN, and routing dependencies while preventing unauthorized access during 100% of approved migrations.
- Integrated network-device onboarding, inventory updates, topology documentation, and operational handoffs across 24 data centers, improving infrastructure visibility and support readiness.
- Partnered with Cisco, Juniper, F5, application, and infrastructure teams during complex service-impacting events, improving escalation coordination and reducing repeated service disruptions by approximately 20%.

Network Engineer

May 2022 - Oct 2022

Virtusa Corporation | Southborough, MA

- Configured Layer 2 and Layer 3 services across Cisco Nexus environments using VLANs, STP, VPC, EtherChannel, Port Channels, VRF, BGP, OSPF, and EIGRP, maintaining network availability during 100% of assigned change windows.
- Managed F5 BIG-IP LTM virtual servers, pools, pool members, and health monitors, improving application traffic distribution and reducing unhealthy-server routing incidents by approximately 20%.
- Secured inter-site and remote connectivity through Cisco ASA and Juniper SRX ACLs, NAT rules, and IPsec VPNs, resolving approximately 15-20 firewall and access requests per month.
- Established HSRP and VRRP gateway redundancy for critical network segments, validating failover behavior and limiting gateway interruption to under 60 seconds during controlled tests.
- Maintained BGP, OSPF, and EIGRP routing environments by validating neighbor relationships, route advertisements, interface readiness, and path-selection policies across enterprise network segments.
- Supported IPsec VPN connectivity by validating encryption domains, NAT policies, tunnel parameters, and firewall rules, improving secure connectivity stability across inter-site environments.
- Administered DNS, DHCP, switching, firewall, and endpoint-connectivity services, completing approximately 20 infrastructure requests per month within established service targets.

- Executed Nexus and firewall upgrades with configuration backups, hardware checks, post-change testing, and cross-team validation, completing 100% of scheduled maintenance activities without unplanned outages.

Junior Network Engineer

Nov 2018 - Dec 2020

Accenture | Hyderabad, India

- Supported enterprise Layer 2 and Layer 3 infrastructure through VLAN, STP, EtherChannel, OSPF, and EIGRP configuration, resolving approximately 20-25 network incidents per month for users and business systems.
- Provisioned Cisco Nexus switching with VRF, VPC, and Port Channels, improving uplink redundancy and supporting segmented connectivity across multiple application and user networks.
- Maintained Cisco ASA, Juniper SRX, and Fortinet ACLs, NAT policies, and IPsec VPNs, completing approximately 15 security and connectivity changes per month under established approval procedures.
- Assisted F5 BIG-IP LTM administration by updating virtual servers, pools, health monitors, and SSL settings, reducing application-routing escalations by approximately 15%.
- Troubleshoot DNS, DHCP, IP addressing, switch ports, VPN access, and endpoint connectivity using CLI commands and packet analysis, resolving more than 85% of assigned tickets without senior escalation.
- Supported DNS, DHCP, IP addressing, switch-port, VPN-access, and endpoint-connectivity requests, resolving more than 85% of assigned tickets without senior escalation.

PROJECTS

MPEG4 Data Center Cutover Readiness Program

- Mapped legacy FabricPath dependencies into Nexus 9000 leaf-spine migration diagrams using Microsoft Visio, documenting four critical network layers across edge, spine, access, and application connectivity.
- Verified VLAN, VPC, VRF, VXLAN, uplink, and application dependencies against implementation plans, identifying 12 configuration gaps before production traffic migration.
- Defined acceptance, validation, and rollback checkpoints across five network-control areas, helping teams complete 100% of planned production transitions without unapproved changes.

Network Configuration and Asset-Control Repository

- Consolidated switch, router, firewall, IP-addressing, DNS, and DHCP records into a controlled repository, organizing 6 operational data categories for faster support reference.
- Reconciled device configurations with Visio diagrams and Remedy change records, identifying approximately 15 documentation and configuration mismatches before scheduled maintenance activities.
- Standardized repository update and document-review procedures, improving change traceability across 100% of records and reducing repeated reconciliation effort by approximately 20%.

EDUCATION

Master of Science in Information Technology

Jan 2021 - Aug 2022

Ferris State University | Big Rapids, MI

Master of Science in Applied Management

Jan 2019 - Dec 2020

Osmania University | Hyderabad, India

Bachelor of Business Management

Jan 2015 - Dec 2018

Osmania University | Hyderabad, India

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA)
- Cisco Certified Network Professional (CCNP) - **In Progress**
- AWS Cloud Computing Certification
